EXPERIENCE

Infosys

Jun 2026 - Present

Specialist Programmer

Mysore, India

- Designed and delivered a full-stack Generative AI application, UnitedAir, using Spring AI and a strict Retrieval-Augmented Generation (RAG) pipeline that grounded 100% of responses in an internal Knowledge Base (KB).
- Created agentic AI workflows with custom tools and Spring AI Advisors for 3+ LLM models, improving reliability, security, and contextual accuracy in enterprise-grade prompts.
- Integrated GPT-4.1, GPT-4o, and GPT-4o-mini into the enterprise ecosystem while using Spring Cloud Stream to build scalable, event-driven pipelines for high-volume AI data flows.

Infosys

Jan 2026 – Apr 2026

Power Intern

Mysore, India

- Built responsive frontend interfaces and backend microservices for a real-world enterprise platform using React, TypeScript, Java, and Spring Boot, supporting 3+ core product features.
- Strengthened system robustness and maintainability by implementing Spring Security, Aspect-Oriented Programming (AOP), global exception handling, bean validation, and Swagger-based API documentation for production-ready services.
- Streamlined enterprise operations by integrating Azure Communication Services (ACS) and automating deployment workflows with CI/CD pipelines on the Infosys DevSecOps Platform (IDP).

EDUCATION

Dayananda Sagar College of Engineering

Bengaluru, India

Bachelor of Engineering, Electrical and Electronics Engineering – CGPA: 8.4

Nov 2022 – Jun 2026

PROJECTS

EZ Chat | [Live](#) | [Github](#)

React JS, Spring Boot, MongoDB, Tailwind CSS, WebSockets

- Created a full-stack real-time chat application using React, Spring Boot, MongoDB, and Tailwind CSS, implementing STOMP WebSockets for zero-latency sharing of text and media up to 50 MB.
- Integrated an AI chatbot using Gemini to allow users to resolve queries directly within the platform.
- Features:** Secured REST APIs and WebSocket endpoints by implementing Spring Security, JWT, and OAuth2 for robust user authentication and data protection.

Herita Quest | [Live](#) | [Github](#)

Spring Boot, React, Tailwind CSS, PostgreSQL

- Developed a full-stack interactive application utilizing Gemini AI to generate dynamic cultural quizzes for 200+ map locations based on user-selected themes (History, Food, Games) and question formats.
- Constructed a secure backend architecture with Spring Boot and PostgreSQL, integrating JWT and OAuth2 to manage user authentication, track quiz history, and maintain a competitive leaderboard.
- Features:** Interactive Map (200+ Locations), AI Quiz Generation, Secure REST APIs, OAuth2 & JWT Authentication, Leaderboard, Responsive UI

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, TypeScript

Backend Frameworks & Architecture: Spring Boot, Spring Security, Spring Cloud Stream, Microservices

Frontend Technologies: React.js, Tailwind CSS, Bootstrap, Redux

Artificial Intelligence: Spring AI, Agentic AI, Generative AI, RAG (Retrieval-Augmented Generation)

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Apache Kafka

DevOps & Testing: Docker, JUnit, Mockito

Core Computer Science: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), System Design, DBMS, Operating Systems (OS), Computer Networks (CN)

ACHIEVEMENTS

- Solved 1000+ problems across [Leetcode](#), [GeeksforGeeks](#), and [Coding Ninjas](#)
- Successfully completed [GfG 160 – 160 Days of Problem Solving Challenge](#)
- Completed the [ROTECH Hackathon](#), conducted by BMSCE, and got a spot in the Top 10 teams.
